Subject: FW: Pet product overview
Attachments: Pet Collars.docx

To inform the decision going forward, Julie and Bo pulled the following information from OPPIN to scope out the universe of spot-on products, collars and "other" pet products. If the OPPIN search is correct, the universe of collars is only 24 registered products.

From: Breeden-Alemi, Julie

Subject: Pet product overview

Here is an estimated overview of pet products:

In July of 2016 it was estimated that there were 880 conventional active dog and cat products. There are approximately 162 registration numbers for spot-ons and 24 registration numbers for collars. The number of products unaccounted for would include products such as dips, sprays, dusts, and shampoos. Keep in mind also that there are several actions in-house that could change these estimations.

Spot-ons:

162 Registration Numbers

29 Companies

AI's listed include: fipronil, demiditraz, imidacloprid, pyriproxyfen, permethrin, S-methoprene, cyphenothrin, etofenprox, phenothrin, piperonyl butoxide, MGK 264, novaluron, amitraz, spinetoram, indoxacarb, dinotefuran, acetamiprid

Collars (see attached Word document):

24 Registration Numbers

12 Companies

AI's listed: amitraz, pyriproxyfen, gardona (cis-isomer), S-methoprene, flumethrin, imidacloprid, piperonyl butoxide, deltamethrin

Hi Natalie,

Regarding the flumethrin/imidacloprid pet collar topic we have a conference call currently scheduled for this week on August 10th at 2:30. We will loop back with Peter and Mike following our call.

Thank you,
Marietta

Subject: RE: Draft of the pyriofenone chronic bee study

Thank you Michael – just wanted to give you a heads up that I will be away on duty travel for the remainder of the week and then on annual leave until August 15th.

In my absence, should you agree that it would be of value to have our evaluators discuss the science further, I would ask that you contact Connie Hart, who I have copied on this email. Connie is aware of the file and would be able to assist in pulling together the HC participants for such a discussion.

I was also wondering if we could look to book a meeting for mid-August as a follow-up to the recent discussion between PMRA and the EPA with regard to the review of flumethrin/imidicloprid pet collars. The PMRA had committed to a follow-up meeting with the EPA once we had met with Bayer on this file. I will look to have my EA book this meeting for mid August.

Thank you.

Mike – excellent. Thanks.

Concerning the collar piece – I'd suggest we delegate that to the lead BC's. Imidacloprid is with Meredith and the other one is with Marietta. Might be something else to mention tomorrow at staff.

Subject: Inquiry regarding Seresto flea and tick collars

Hi Sven,

I hope you are doing well. A requestor recently came across the [USA Today reporting on Seresto flea and tick collars](#) and asked me to help “get a status update from EPA on how [the agency] plan[s] to respond to the influx of incident reports submitted regarding use of the Seresto flea and tick collar.” The requestor also asked for “any additional data on the recent incidents,” such as a breakout regarding the severity of the incidents and any additional information beyond the agency’s public responses. When I asked if there was a desired timeframe for a response, the requestor indicated that there wasn’t a timeframe, just whenever the agency has an update.

In providing some background information to the staffer, I pointed out excerpts in the [February 2020 proposed interim registration review decision for imidacloprid](#) and [March 2020 interim registration review decision for flumethrin](#), that acknowledged the agency is aware of multiple human and pet incidents potentially associated with use of the flea and tick collars. I also mentioned that the agency evaluates and synthesizes multiple sources of information, including incident data, to inform the registration review decision, and that the evaluations of such information are accessible in dockets on [regulations.gov](#).

I hope that you’ll find this request straightforward. If you have any questions about the inquiry, just let me know. I appreciate your help and look forward to the response from the agency, that I will then relay to the requestor.

Best Regards,

Jerry Yen, Ph.D.

Hi Nick,

Thank you for sharing your thoughts.

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

I would encourage you to consider a developmental assignment in RD if you are interested in learning more about the FIFRA labels and review process for these types of products. Quite a bit of work goes into ensuring that labels are clear and that products are supported by experimental data for both efficacy and companion animal safety prior to being registered. There is no lack of expertise in label writing. What is missing is a scientific explanation for why reports of certain effects are occurring, and if they are ubiquitous observations or associated primarily with specific products.

We take the responsibility of regulating these products very seriously, and I appreciate the work of the incident review team in helping to inform our decisions.

Kind regards,
Catherine

Hi Ana,

We had a Soresto Flea Collar incident reported recently.

Case #4380: A veterinarian reported a dog experienced lethargy and incoordination after a Soresto Flea Collar (flumethrin and imidacloprid) was applied off and on for two months.

Thanks,

Amy

Subject: Soresto dog collar complaint

12 yr old border collie/terrier mix

Symptoms: vomiting, gastrointestinal issues, stopped eating, eventually neurological issues which included paralysis starting with his back legs then all four legs and eventually death all within an 8 month period. He was a healthy 12 yr. old with full of life. He had ABSOLUTELY no issues until I put this collar on him and before I put two and two together it was too late. I rescued him at the age of two and now I feel to blame for his death. This is ethically and morally wrong what these pesticides are doing to our pets and what the long terms effects are to our own health. This product needs to be addressed ASAP!!

Pesticide: Soresto (imidacloprid and flumethrin)

Cyran, Carissa has shared a OneDrive for Business file with you. To view it, click the link below.

 CU-Flea-Tick-Products_2021-for-EPA-review-21-04-07.docx

<!--[endif]-->

Hello,

We have been asked by FDA to review an outdated article that is on their currently on our web site. The previous version was published in 2014 and focused more on the pyrethrin/permethrin products. FDA has now revised the web page (word file attached and linked) to be a high-level piece encouraging pet owners to work with their veterinarians to select the appropriate product for their situation, use products safely, be aware of the potential for adverse events, and to report these to the regulating agency if they occur.

Staff have reviewed and provided comments/edits, all in track changes. Can you please review and provide any comments edits by 10:00 am tomorrow?

Once you have reviewed, I will send this forward for OPP IO and OCSPP IO approval.

Thank you,

Carissa

Good morning all,

As part of our outreach on flea and tick products, we've revised an outdated article that is currently on our web site and invite your review and input. The previous version was published in 2014 and focused more on the pyrethrin/permethrin products. We have revised this to be a high-level piece encouraging pet owners to work with their veterinarians to select the appropriate product for their situation, use products safely, be aware of the potential for adverse events, and to report these to the regulating agency if they occur.

Could you all review and add language you feel is appropriate for EPA's evaluation and registration of these products? Or let us know if you would like us to point to a companion piece on your web site?

Would it be possible to receive your comments back by **next Friday, April 16**? Please let me know if you need additional time.

Thanks so much,
